

Are you fed up with high product rejection rates? **VIBCO has a very sweet solution.**

We're the ^{SILENT} Vibrator Guys.™

Product Application Bulletin #492 Model SCR-500 Adjustable Speed & Force Electric Vibrator

VIBCO'S SOLUTION

A VIBCO SCR-500 Adjustable Speed & Force Vibrator was mounted to the underside of the conveyor. Now the chocolate and marshmallow spread evenly and consistently, resulting in a higher-quality product with a much lower rejection rate. The adjustable speed gave the customer the ability to tailor the vibrator speed for optimum results.

VIBCO'S BENEFITS

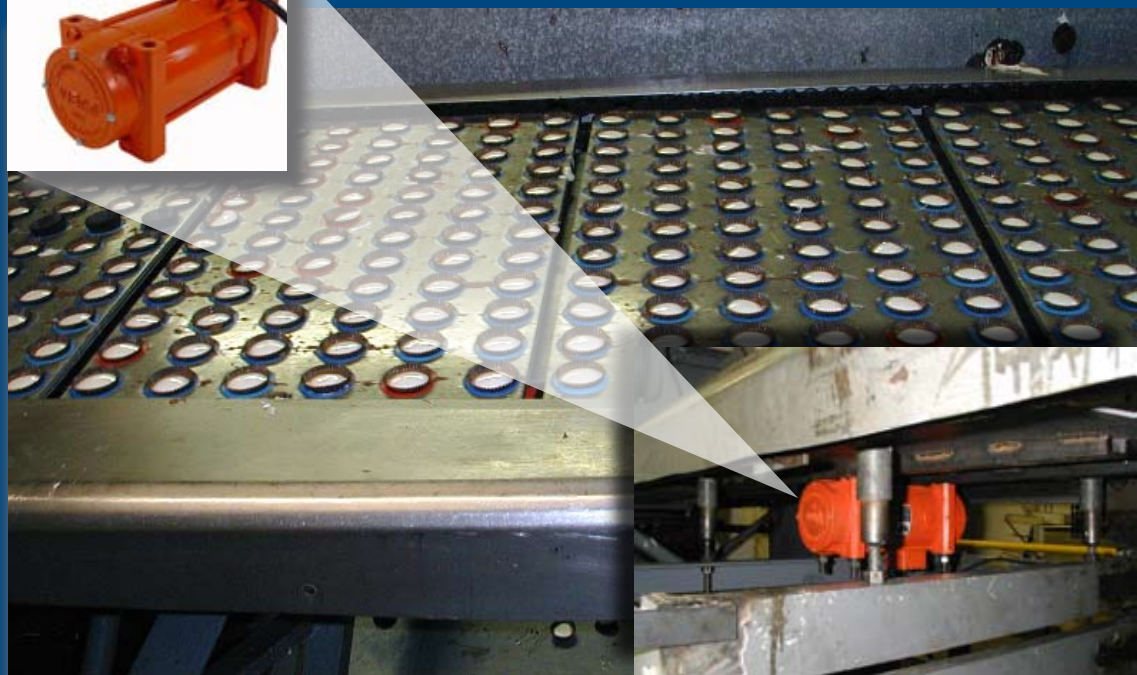

After installing the VIBCO SCR-500 Adjustable Speed & Force Vibrator, the customer received the following benefits:

- Dramatically reduced rejection rate
- Improved product quality
- Greatly reduced product loss
- Customized vibration with adjustable speed to optimize results

SCR-500

CONVEYOR VIBRATORS

"Our rejection rates were way too high..."

We had a 25-30% rejection rate on this production line. At 660,000 pieces per day, that's a whole lot of wasted product. We had been using oscillators, but they didn't spread the chocolate and marshmallow evenly. My production manager had suggested that we switch to vibrators - I wish we'd listened to him sooner! Our rejection rate is down to about 5% and the quality of our candy is better and more uniform. The adjustable speed is great - it allowed us to fine tune the vibration to get just the right results. Thanks!"

Plant Engineer
Jim L., Pennsylvania

Model SCR-500 Adjustable Speed & Force Electric Vibrator

- 950-2500 VPM continuous duty
- 500 lbs of force
- 2500-4000 VPM intermittent use
- 70 dB on A-Scale at 1 meter
- 115/230 Volt
